

Frequently Asked Questions Emulations

- 1) What emulations are available with Datamax-O'Neil products today?
Support today includes
Zebra – PLZ
Intermec – PLI
Boca - PLB
- 2) What do I need to do to run in emulation mode?
As long as the printer is set up in an emulation mode you don't need to do anything further.

If you ordered a specific emulation with the printer it is already set up as the default.

If you downloaded firmware it can be set up in the software menu.
- 3) Can I still use the media that supports the Zebra coated side out?
Most Datamax-O'Neil printers support both coated side-in and coated side-out allowing support for the Zebra ribbons.
- 4) Is there an added cost for emulations?
No, there is not a charge for any of Datamax-O'Neil emulations.
- 5) Does emulation come standard on the printer when I order it?
You will need to order the printer with the emulation you require.
- 6) What if I already have a printer and I need to install emulation?
Download of emulations for most current model printers are available on the Datamax-O'Neil website.
- 7) Can I have both DPL and emulation on the printer at the same time?
Yes, all printers will include DPL. You can add any one of the 3 emulations currently offered by Datamax-O'Neil.
