A New Service Program Agreement with Motorola Offers Datamax-O'Neil Customers Expanded In-Country Repair for Portable Printers

Orlando, FL – April 14, 2009 – Datamax-O'Neil and Motorola have signed a service agreement that authorizes Motorola to provide both in-warranty and out-of-warranty repair of Datamax-O'Neil portable printers at Motorola repair depots in Argentina, Brazil, Mexico and Canada. This gives Datamax-O'Neil customers in these countries expanded options for having their portable printers repaired in-country rather than shipping them out-of-country, which adds time and expense to the repair activity. The Motorola technicians at the repair depots have been trained and certified by Datamax-O'Neil service experts.

“Datamax-O'Neil is committed to providing the best possible repair service to our customers, and offering this additional capability makes printer repairs much more convenient,” said Mike Hatter, manager of support operations for Datamax-O'Neil. “It also helps increase productivity by offering speedier and more cost-effective repairs for customers that do business in these countries.”

An important benefit for those customers who utilize both Motorola handheld computers and Datamax-O'Neil portable printers is that they can now enjoy the advantage and convenience of a “one stop” repair capability by leveraging one of the Motorola service centers to provide all their repairs. “With the mobile workforce quickly growing around the world, it is imperative that downtime be minimized, and this new repair capability answers that need,” Hatter said.

About Datamax-O'Neil

Datamax-O'Neil is a trusted global provider of stationary and portable label and receipt printing solution products that enable manufacturing and supply markets to capture the benefits of automated product identification and automated legal and financial transactions. Datamax-O'Neil is the barcode and mobile printing business group of Dover Corporation's Product Identification Group (PIDG), a global platform entity with products and services covering all the leading marking technologies and applications. The company's products address a wide variety of applications, including those in the industrial, healthcare, retail, automotive and ticketing market sectors. Datamax-O'Neil is headquartered in Orlando, Florida, and maintains key facilities in California, Illinois, and France, as well as sales and technical support offices around the world.
