

FOR IMMEDIATE RELEASE

Datamax-O'Neil Portable Printers Become Wavelink-enabled for Device Management

Partnership Provides Ease of Deployment and Integration into a Heterogeneous Networking Environment

MIDVALE, UTAH and ORLANDO, FL — June 23, 2009 — Wavelink Corporation and Datamax-O'Neil today announced that Datamax-O'Neil has selected Wavelink® Avalanche Mobility Center™ (MC) software to pre-load on all of its wireless, 802.11-enabled mobile printers. This partnership demonstrates Datamax-O'Neil's commitment to continuously increasing the efficiency of its enterprise printing solutions and further solidifies Wavelink's position as the standard in wireless enterprise management.

Datamax-O'Neil customers are now empowered to deploy industry-leading management software from Wavelink to remotely monitor and configure their Datamax-O'Neil wireless printers as part of a heterogeneous environment, along with additional wireless devices on the network. Customers using Avalanche MC benefit from extensive management functionalities that include centralized remote management, performance monitoring, software distribution and crucial device security.

"Wavelink is a complete management solution that can handle multiple device classes and brands," said Endre Vargha, vice president of engineering and general manager for Portable Products at Datamax-O'Neil. "Partnering with them enables users that have already deployed Wavelink Avalanche in their network to easily add and manage Datamax-O'Neil printers as part of that environment."

Wavelink customers can now easily manage and configure Datamax-O'Neil printers through the same interface they use for their other wireless devices. The agreement also adds to Wavelink's industry-leading network of hardware partners that represent the world's largest mobile device manufacturers across a broad range of devices.

"The trend for companies to be more mobile and implement wireless technologies continues its strong growth. As the number and type of devices increases, the ability to manage them easily through a single interface becomes even more critical," said Wavelink President Lamar Van Wagenen. "Datamax-O'Neil is well-recognized as a leader in wireless mobile printing, and our partnership continues Wavelink's focus on providing powerful management tools that work seamlessly in diverse environments with several different product brands and device types."

The Datamax-O'Neil 802.11-equipped mobile printers that have been integrated with Wavelink Avalanche Mobility Center include the microFlash family of portable printers, O'Neil Compact portable printers (OC2 and OC3), and the LP3 label printer. About Wavelink

Founded in 1992, Wavelink Corporation is the leading provider of multi-vendor mobile application development and mobile device and infrastructure management software. Wavelink's technology solves the unique challenges involved in deploying, managing and controlling auto-ID data collection (AIDC) systems and RFID, and facilitates peak performance from frontline staff. Wavelink's emulation product family is the industry standard in providing host connectivity solutions. More than 8,500 companies in the retail, manufacturing, government and logistics industries rely on Wavelink to accelerate application delivery, reduce device management and support costs, and tighten network security. For more information, please visit www.wavelink.com or call 1-888-697-9283.

About Datamax-O'Neil

Datamax-O'Neil is a trusted global provider of stationary and portable label and receipt printing solution products that enable manufacturing and supply markets to capture the benefits of automated product identification and automated legal and financial transactions. Datamax-O'Neil is the barcode and mobile printing business group of Dover Corporation's Product Identification Group (PIDG). The company's products address a wide variety of applications, including those in the industrial, healthcare, retail, automotive and ticketing market sectors. Datamax-O'Neil is headquartered in Orlando, Florida, and maintains key facilities in California, Illinois, and France, as well as sales and technical support offices around the world.
